

IT'S TIME TO PROTECT AUSTRALIA'S CORAL SEA

The Coral Sea's crystal clear waters, located between the Great Barrier Reef Marine Park and our maritime border with Papua New Guinea, the Solomon Islands and New Caledonia, host majestic whales, threatened turtles, massive marlin and other spectacular marine life.

More than 52,000 people have signed a petition urging the federal government to protect this remote area by making it the world's largest marine national park.

The commercial fishing industry is willing to restructure and remove fishing from this special place, provided the federal government offers a fair financial package to the small number of affected operators.

A Coral Sea marine national park will be a great asset for Queensland's future.

A federal government decision is coming soon.
